

LARSON AND KEENEY HOME SERVICES

THE ROOF INSTALLATION PROCESS

1 Inspection and Planning

Inspect the roof and choose materials.

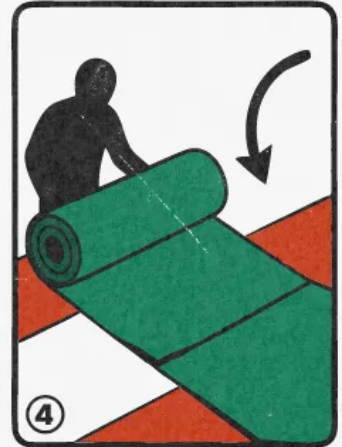

2 Remove the Old Roof

Tear off shingles and inspect the decking.

3 Repair Roof Decking

Replace damaged wood for a strong base.

4 Installing Underlayment

Add a protective barrier against moisture.

5 Install Flashing and Drip Edge

Seal edges and joints to prevent leaks.

6 Install Roofing Material

Lay and secure shingles, metal, or tile.

7 Ventilation Installation

Add vents to control airflow and reduce moisture.

8 Final Inspection and Cleanup

Final quality check and remove debris.
